

Parental Online Learning Questionnaire Responses January 2021

Which year group/s do you have children in?

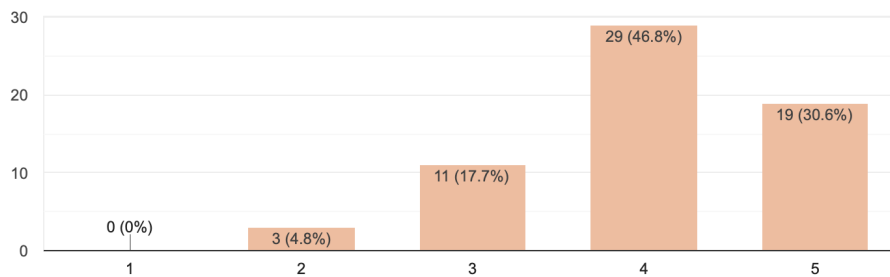

62 responses

How would you rate your child's emotional well being currently?

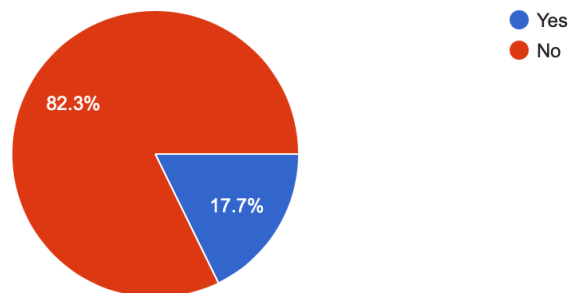

62 responses

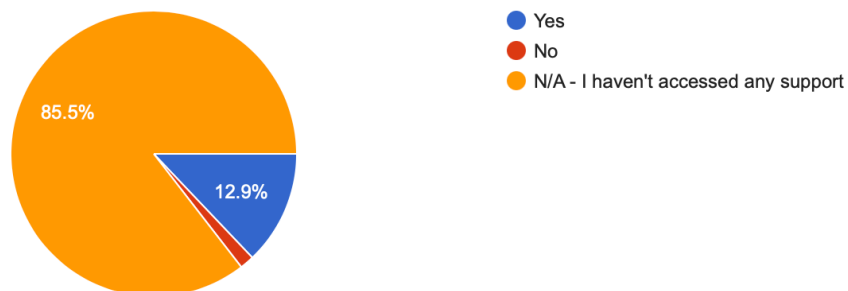

Have you requested support from school during this lockdown?

62 responses

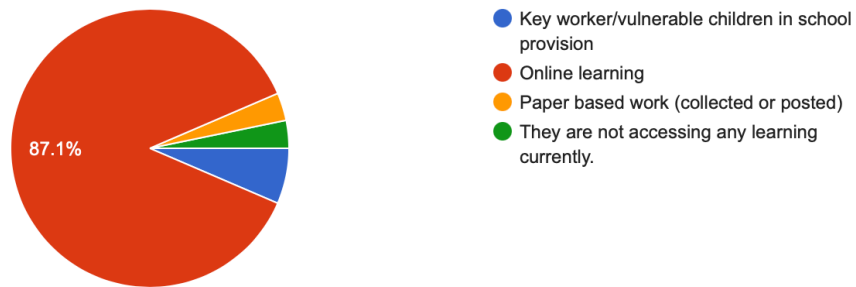

Did this support provide a resolution?

62 responses

What is the primary method your child is using to access learning?

62 responses

Only answer this question if your child is accessing no learning - What is preventing you child from accessing learning?

4 responses

- He just won't do any work
- N/A
- Poor internet connection despite having a signal booster.

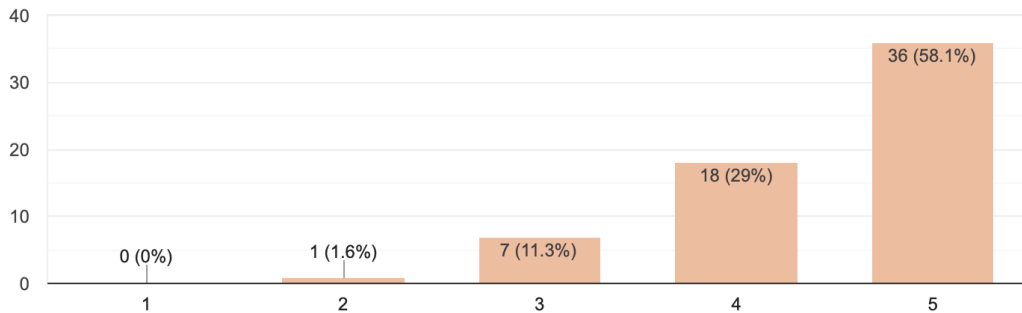

Do you have enough devices at home for your child/children (who attend our school) to access online learning?

61 responses

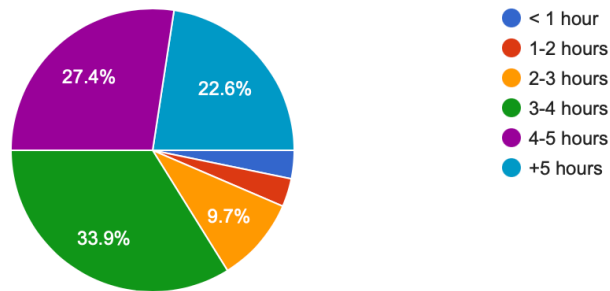

How would you rate our school provision for providing learning to children during this lockdown?

62 responses

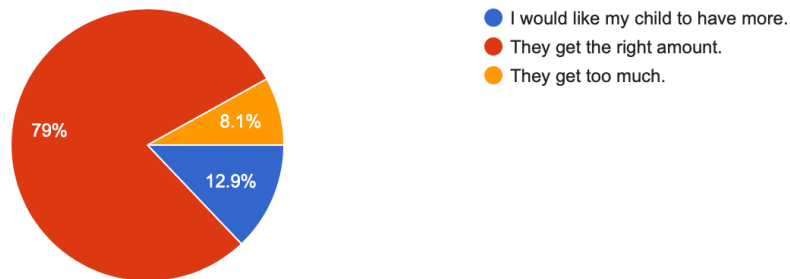

Approximately, how many hours a day is your child doing school learning?

62 responses

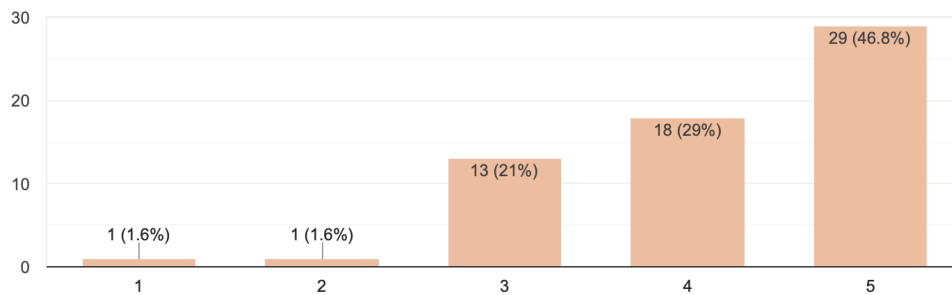

Do you feel that your child is getting the right amount of work?

62 responses

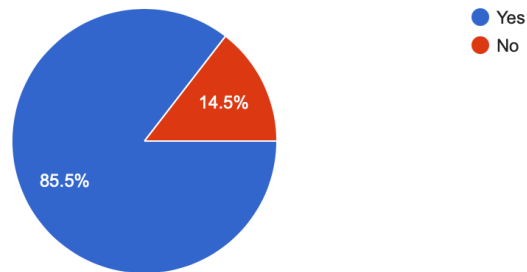

How would you rate the feedback that your child is getting about their learning? This may be provided through the weekly phone call to your child, marking work online or work that has been sent into school and/or through whole class feedback.

62 responses

If your child were to encounter any safeguarding concerns online, do you know who you need to contact?

62 responses

What is going well with our remote learning provision/support?

53 responses

- Every aspect. Scarlet looks forward to every lesson. The teachers are engaging, informative and they are doing a fantastic job. It's nice to see the interaction, even through the virtual classroom.
- The work has great structure, Ryan understands what he needs to achieve, the teachers are fantastic with the children and parents of questions.
- The teachers are there to help with all the work very well done
- I like the private comments after work has been submitted. It gives my child something to look forward to and motivates her for the next day.
- My child gets to learn whilst still seeing her friends and her teacher through google classroom
- Daily lessons being uploaded, so not too much in 1 day, we can't get onto live lessons but that's due to us having 4 devices on for 4 children to learn, but the teachers have been brilliant in responding to work and making calls home. The remote learning is easy enough to understand and has been broken down for the children to understand.
- Everything
- Nothing I'm afraid
- I feel the remote learning is amazing having both yr5 teachers and also being able to see and hear peers is motivational
- Good support from teachers, communication and next best thing to really being at school. It's great seeing her interacting with her class. Classrooms app is great and my daughter loves it. Cannot fault anything. Am impressed.
- The interaction. The lessons are perfect
- The teacher is very understanding that sometimes they don't want to do any work
- The children have done much better with online working seeing their teachers and friends has really helped to motivate them more into doing school work at home.
- The online classroom sessions and being able to be in contact with the teacher is brilliant.
- Face to face online teaching. Teachers being available and engaging all students online.

- Teachers always there to support
- That's the resources and passwords are all in google classrooms for us to access
- I appreciate all the teachers are doing in these difficult times. Lessons are being done when there are scheduled to happen.
- He feels more relaxed in the home environment without the distraction of the classroom and can undertake his work at his own pace. He also feels quite comfortable to complete his work utilising a keyboard. He's very much enjoyed the ability to undertake independent research of the class topic, further enhancing his learning.
- Consistent learning everyday
- Work is uploaded early to be used at the start of the day
- Interaction
- Violet really enjoys seeing and being able to interact with her teachers and classmates in the online classroom. This has helped a lot with her emotional well-being compared to the previous lockdown. It is great that she is getting feedback on her learning too.
- The staff are always available to talk to as they can be messaged with a fast response.
- Interaction with their teachers and set lessons.
- I'm not getting any support, just picking up work and working through it. Not had any contact with my child's teacher.
- The learning is great, but my son struggles to concentrate and finish his work on time.
- The whole system & set-up is brilliant! I couldn't be happier with Mr TM & Miss Morgan for all the hard work & effort they're putting in with & for my daughter! 😊 Seeing my daughter still being able to access her normal education with her teachers & class & continue to learn is a joy! Thankyou! 😊
- My children love the interaction they are having with their teachers
- SHE'S KEEPING ON TRACK WITH HER LEARNING AND GAINING SKILLS.
- They get more help and explanations than the last lockdown
- Keeping Lonnie interested and occupied.
- All of it
- Online classes this time more prepared
- They seem to have settled in really well it helps that the teachers are happy friendly and helpful
- Keeping her brain engaged
- It was already set up and from the first day has been seamless
- Work supplied for printing
- She is enjoying see friends and teachers online, defo better this time around than last lockdown. She struggles doing homework, but I think it's a mixture of issues. Some due to covid, some due to lack of motivation.
- She's is learning still but the online learning is a great help for Regan and us as parents as it's all different to us
- The online classes are amazing! The structure and routine of the classes are brilliant. Miss Boyle and Miss Tonks are doing such a good job
- Athletics and Myon - requires no printouts!!
- It's not 'in your face' learning (if that makes sense) the children have their own pace of doing the work set which I think helps (I think a lot of the children were worried about

not having finished the set work for that lesson). The teachers are always there to help (students & parents) when needed.

- The live lessons are fantastic and engaging and the teachers are presenting them in a great way for the children.
- Apart from the odd internet glitches the teachers 5TM & 5M have been brilliant
- They get to see their teacher online on a day to day basis. This really helps because the teacher can explain in more depth if needed if their unsure of anything.
- Well-structured and organized.

How could we improve our remote learning provision further?

39 responses

No Improvements required

- Can't think of anything/It doesn't need any improvement x13
- Not just saying this to be kind, but I really think you are giving everything you can and we greatly appreciate it.

More time to complete work/pace/amount of learning

- A little more time to do work
- As a family were struggling with the time given between each online lesson to complete the work. We always have to come back to the work later on in the day because we need to move onto the next live lesson. The work is doable however it takes a little longer to explain after the lesson and go through with my child. Sometimes we don't have enough hours in the day to complete every piece of work set.
- My child struggles with the pace and doesn't always feel confident to ask for help online.
- Less online time. 3 hours is too much for 5 year olds. Some paper-based work, recorded lessons that can be accessed at a later time, as the morning might not be convenient for parents to support their kids, whilst working from home.
- I personally would like to see my daughter doing more if possible

Submitting work online

- Be able to send work easier I can't do it on google classrooms and have had trouble with the email to the point miss Boyle had to email off her personal one to be able to respond to me hopefully I will now be able to access this as she helped me loads with getting the email correct
- Submit work for marking online
- Editing the worksheets has been quite difficult at times. I have personally had to spend an excessive amount of time downloading, updating and then learning the procedures necessary to to edit and return the work. I could not have expected my child to understand the many procedures involved. It is not simple. The procedures need to be simplified. Despite these initial hiccups, the provision this time compared with the first school closures last year is far better and my child's teacher has been very understanding when I have spoken to her.

Feedback

- Explaining lessons a bit more and what is required and when to log off until the next lesson, my child isn't always sure
- More feedback on the pieces of work submitted.
- The online work submitted has only been marked once so far so would be nice to see a few more comments as I find this massively encourages the children.

Lesson type/Structure/Challenge

- It would be nice to have some more creative art or science based activities to do that are away from the computer, as currently everything is screen based and she is complaining of sore eyes by the end of each day.
- Sometimes Charlie finds the work a little too easy and finishes it quickly.
- Maybe a one to one online with his teacher so he can focus a little more
- Maybe doing a topic live lesson
- Large part of the available time for online teaching should be used for active, communicative tasks and less for independent tasks.

Miscellaneous

- My daughter does say she misses having 1 - 1 discussion with her teacher about the work.
- Having him back in school
- Sort the technical issues with live lessons.
- Teacher work, extra work on areas which need improvement.
- Better access for remote learning and better connectivity.
