Year 1 - NumBots

Dear Parents/Carers,

We are pleased to let you know that your child has access to NumBots, an engaging online platform designed to support their mathematical development both in school and at home.

NumBots focuses on building strong foundations in number sense, addition, and subtraction through fun, interactive games. It helps children develop fluency and confidence with basic calculations, which are essential for success in all areas of maths. The programme adapts to each child's level, allowing them to progress at their own pace while reinforcing key skills.

We encourage regular use of NumBots at home as part of your child's home learning routine. Just a few minutes a day can make a big difference in their understanding and confidence: aim for your child to play NumBots for 3 minutes per day, 4 times a week. Your child's login details have been provided, and they can access the platform on a computer, tablet, or smartphone.

Thank you for your continued support in helping your child thrive in their learning. If you have any questions or need help accessing NumBots, please don't hesitate to get in touch.

Yours sincerely,

Mrs Platt
Maths Lead
